

## Company Profile

### Introduction

We have great pleasure to introduce ourselves as one of the leading contracting company doing the job of fabrication and installation of Stainless Steel Railing, Glass Railing, Pipes Railing, Balcony Railing , Staircase railing, Auditorium railing, Wall Railing, Store Fixtures, skylight, Stain less steel Gates. and, All types of interior Works, patch Fitting, Spider fitting and Doors. We are in this field for past 15 years and have successfully completed projects to the satisfaction of our valued clients.

Façade Engineering is changing the concept of Architecture. Architects in India today are keen to give building a more unique and futuristic appearance by using Glass Railing, Staircase Railing Stores Fixtures, Skylights etc...Thanks to the technical development that has taken place in international market.

However this is not without the complexities involved particularly, the new products and concepts that are coming in the market, the interfacing of several agencies doing different types of Railing work in a project and above all the cost involved. Hence architects do feel the need of service from someone like us to formulate their ideas from drawing board to the actual façade. (Projects Completion).

The Practical experience of our promoters in the field, insight of the customer needs attention to the beauty of the structure and the tireless efforts in the timely completion of the projects have been the inspiration to offer a wide range of architectural Steel products. Further we have a team of Engineers, who have executed prestigious projects in India, in various types of Railing store fixtures Construction. With their expertise, we endeavor to give, what is best to suit local conditions.

Looking forward to your kind response, so that our association can begin well.

## **Safety policy**

We are fully committed to provide a safe working environment to our staff and at sites. Implementation of safety measures are kept under close watch at every stage. Our emphasis is on the following:

Double staging in case Bamboo Scaffolding.

No alcohol at work.

Mandatory use of safety belts, gloves, safetyshoes, helmets etc.....

In addition, an environment is created which is conducive to exchange of ideas and suggestion regarding productivity, quality and safety related issues. In short our efforts is to obtain a zero accident rate.

## **Executive System**

Once a project is entrusted to us, we study, evaluate & form a task force to depute to that site. The Engineer in charge walks in with a team of competent and engineers to ensure smooth progress of projects. Bar Chart is chalked out and is followed rigorously. Progress of each work is monitored on daily basis at Engineer level. The following system are adopted for efficient monitoring of progress and effective execution.

Bar Chart.

Daily progress report

Fortnightly material requirement

Highlight major issues

In short, we want to deliver the projects on time and without over running the cost.

We never compromise with quality of material and that of finishes.
